Sales Analysis

Highest selling pizza Size

Large \$379021

Size based Sales comperison

Revenue Generated

Sales Analysis

Size based Sales comperison- Veggie vs Non-Veggie

03. Insights

Insights & Recommendations

- Based on the analysis we have performed, we have the following insights and recommendations for the business

Insights

- Business has not been growing. The growth of this business has been stagnant over the years.
- Average order value is highest during the lunch hours, however, it generates lower sales volume compared to dinner.
- The Hawaiian Pizza and The classic Delux pizza are the 2 highest-selling pizzazs for lunch and dinner.
- The classic pizza category has generated the most revenue (\$223k)
- Large has been the most popular size among all. It is responsible for (\$379K) worth of sales.
- Non-Veg is the most popular category of Pizzas

Recommendations

- To increase overall sales, we can give offers combining the highest-selling pizzas with the smaller portions of lowest lowest-selling pizzas
- We can give discount offers on XXL size of the most selling pizzas
